Summary

MCA graduate and Java Full Stack and MERN Stack Developer who builds and ships complete web applications end to end. Develops secure REST APIs with Java, Spring Boot, Hibernate and Node.js/Express, responsive front-ends with React.js, and databases with MySQL and MongoDB. Built 3 deployed full stack projects, including a live production platform, and completed 2 web development internships working in Agile teams with Git and code reviews. Strong foundation in Data Structures, Algorithms, OOP and DBMS. Based in Pune, open to relocation and available to join immediately.

Skills

Languages: Java, JavaScript (ES6+), SQL, HTML5, CSS3
Java Full Stack: Spring Boot, Spring Security, Spring Data JPA, Hibernate, REST APIs, JWT, Maven
MERN Stack: MongoDB, Express.js, React.js, Node.js, Redux, React Router, Tailwind CSS
Databases: MySQL, MongoDB
Tools & Testing: Git, GitHub, Postman, JUnit, Jest
Core: Data Structures, Algorithms, OOP, DBMS

Experience

Labmentix Private Ltd Pune, Maharashtra
Web Development Intern *December 2025 – March 2026*

- Built full stack features using Java, Spring Boot, Spring Data JPA, MySQL and React.js from requirements.
- Wrote JUnit unit tests, fixed bugs and took part in code reviews within an Agile team using Git and GitHub.

CodeElevate Technologies Pune, Maharashtra
Web Development Intern *June 2024 – July 2024*

- Built REST APIs with Node.js, Express and MongoDB, and React.js with Redux front-ends for an e-commerce app.
- Developed a role-based inventory module and an admin portal for products, and fixed UI performance bugs.

Projects

Event Booking Management System | *Java, Spring Boot, Spring Security, Hibernate, MySQL, React.js* | **Live** | **GitHub**

- Built Spring Boot REST APIs using Spring Data JPA and Hibernate on MySQL, with a responsive React.js UI.
- Secured all endpoints with Spring Security and JWT role-based authentication for User and Admin roles.
- Prevented double booking under concurrent requests using pessimistic and optimistic database locking.

Shri Vighnaharta Mitra Mandal – Live Web Platform | *MongoDB, Express.js, React.js, Node.js* | **Live**

- Independently built, deployed and maintain a live bilingual MERN platform for a 36-year-old Beed mandal.
- Built Express REST APIs with MongoDB and a JWT-secured admin dashboard for donations and members.
- Integrated UPI payments, WhatsApp sharing, Google Maps and PDF receipts, and fixed live production issues.

Employee Management System | *MongoDB, Express.js, React.js, Node.js* | **Live** | **GitHub**

- Built a MERN HR platform with JWT auth and role-based access for Admin, Manager and Employee users.
- Designed 5 Mongoose models and REST APIs with search, filters and server-side pagination for HR data.
- Automated payroll with PF, tax and leave deductions, PDF payslips via PDFKit and Jest unit tests.

Education

JSPM Narhe Technical Campus, Pune 2025
Master of Computer Applications (MCA) – CGPA: 7.00 *Pune, Maharashtra*

Balbhim College, Beed 2023
Bachelor of Science in Computer Science (B.Sc. CS) – 82% *Beed, Maharashtra*

Certification

Full Stack Java Development – Cyber Success Aug 2026
Core Java, Spring Boot, Hibernate, REST APIs, React.js and MySQL (Credential ID: 2608162356)
